

WALL MOUNTED SNAP FRAME BACKLIT

Our wall mounted snap frames enable you to quickly update your signs or posters in a snap. Graphics install and can be changed easily in seconds with the snap frame graphic system. Just open all 4 sides of the frame, remove the UV resistant PVC protection film, insert your graphic, replace the protection film, and then snap the 4 sides frame closed. The snap frames are constructed of anodized silver aluminum with 35mm snap frame rails. The wall mounted snap frames can be installed horizontally or vertically and includes mounting hardware for installation. LED lights run around the perimeter of the frame with an acrylic panel diffuser to make sure lighting is even across the board. The power supply is UL listed so you can stay compliant. We offer UV printed graphics on our Backlit Films material for graphic package and graphic only options. Snap frame accepts materials up to 0.5mm thick.
